

EB-575Wi

With the EB-575Wi's dual pens, it's easy to interact with your projection. Featuring a brightness level of 2,700 lumens and WXGA resolution, the EB-575Wi's ultra-short-throw design allows you to present while minimising shadows and glare.

Quality image

Epson's 3LCD technology ensures high-quality images with equally high White and Colour Light Output for vivid colours and bright images, even in daylight, and three times brighter colours than leading competitive projectors¹. WXGA resolution and HDMI input mean that students benefit from sharp, clear projected images.

Dual Pen Interactivity

Epson's interactive pens are now even more responsive and easy to use, with an improved design. Dual pen capability allows for simultaneous, collaborative learning with different pen attributes. The 'hover' function accurately detects the position of the pen when it's not in contact with the projection surface.

Reliable

Project for longer with improved reliability and a longer lamp life of up to 10,000 hours.

Save time

Simply plug in and turn on – there's no warm-up time and the PC-free annotation mode means that teachers don't even need to power up their computers. The interactive function does not require drivers to be installed and it auto-calibrates.

Wireless projector

The wireless capability allows you to show content easily from a range of smart devices using the iProjection App².
