

Epson EB-X11H

DATASHEET

Make your school's budget go further with the Epson EB-X11H – the high-quality XGA projector with a wide range of features and an affordable price tag. This affordable projector has many features usually found on more expensive models, so schools can enhance classroom experiences with high-quality presentations without exceeding your budget.

The Epson EB-X11H is compact and lightweight with a modern design*1 for easy installation use, with a range of inputs in addition to monitor-out, providing both projector and computer screen visuals, so you don't have to turn around to see the screen. The direct power on/off feature enables the projector to be activated using a wall switch for installation use, while the ELPMB23 optional ceiling mount makes installation quick and simple. A long lamp life of 5,000 hours (in eco mode) keeps running costs low.

With a short throw distance, this projector can produce large screen sizes from a short distance, with a 67-inch screen size from a distance of just 2m. In addition, the projector will automatically detect and match the aspect ratio of the input source, and a source search function automatically projects inputs when they are connected.

Epson's 3LCD projector engine delivers the natural, accurate colour that's essential for education, so maps, flags and art look true-to-life. With equally high White and Colour Light Output of 2,600 lumens, and 3000:1 contrast ratio, you can achieve a vivid, sharp image. The optional Epson visualisers and their advanced software help give a close-up view of 3D objects - perfect for classroom demonstrations. Button lock, password, Kensington lock, and security bar are in place to protect the projector from unauthorised use.

KEY FEATURES

- No quality compromise, on a budget
- 2,600 lumens White and Colour Light Output
- 3,000:1 contrast ratio
- Direct power on/off and instant-off
- Built-in security features

EPSON
EXCEED YOUR VISION
