## Professional-grade 1DLP laser projectors

Avoid downtime and reduce maintenance by choosing the Christie® GS Series of laser projectors for your next project.

With 20,000 hours of low-cost operation, wireless connectivity, a compact footprint, quiet operation, and a full suite of interchangeable lenses, the GS Series offers great performance and reliability in high-use environments.

Built-in Christie Twist™ gives you the warping and blending tools you need to quickly and easily set up and align even irregular screens and multi-projector displays.

The DWU1400-GS, DWU1100-GS, and DWU880-GS models work with Christie Mystique™ automated camera-based alignment software, to automatically install, align, and recalibrate multi-projection systems in minutes – saving you significant labor costs. Mystique Lite is available at no additional cost for up to three horizontal projector blends on a flat screen or surface. Whether it's for a museum, place of worship, or a live event performance, the GS Series helps simplify your installation.

^ DWU880-GS is also available in white
