

OVERVIEW

All our PSU™ mounts are designed to align accurately with the projector mounting holes and take account of cooling or lamp access needs. This is what makes our projector suspension units the preferred method of projector mounting.

All PSU™ mounts are now available as micro adjustable versions with 2 axis and precision adjustment for level & tilt.

Custom versions available including mounting downward/upward, multiple projectors, 3D rigs and more.

KEY FEATURES

- Take all the guesswork out of ordering and reduce the installation time as each mount is dedicated to each projector make and model.
- Designed to align accurately with the projector mounting holes and take account of cooling or lamp access needs.
- Neat cable management via the socket located on top of each mount allows cabling to go through a column length and out via a ceiling plate.
- Cradle versions offer alternative mounting to either meet a projectors optical needs or give protection in location-to-location or hire circumstances.
- Micro-adjustment is available on each PSU mount upon request.
- Compatible with any UNICOL column length and a wide range of UNICOL ceiling plates to suit your installation requirements.

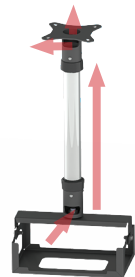

Rapid installation as each mount is designed to suit each make and model.

All mounts available with micro adjustment - call to discuss.

Compatible with any column length for ceiling suspension.

Simple cable management via top socket and through chosen column length.
